The Company

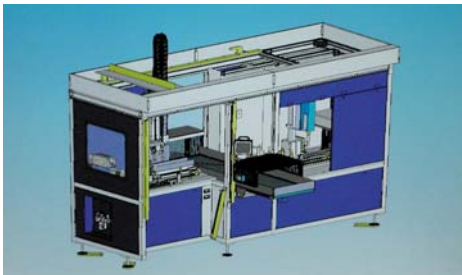

The company

Our business consists of 3 complementary sectors that enable us to deal with your project internally while ensuring quality at all levels:

A project team defines with you the actual requirements of your installations and draws up plans for the solution adopted.

[Design]

Our equipment: stations provided with 2D and 3D design software

[Machining]

Milling

Manufacture of complex and precise parts in all types of materials, one off or small runs.

[Assembly]

Assembly of components, and setting and commissioning of equipment in the workshop on your site. All our designs are supplied with complete documentation, including the approval report by an approved inspection body.

SANDMANN

[Our mission]

Since 1986, SANDMANN has worked in partnership with its customers in their industrial projects, in fields as diverse as health, automotive, pharmaceuticals, plastics, food industry, etc. SANDMANN designs and produces made-to-measure equipment for implementing or optimising manufacturing processes. This equipment takes the form of tooling, workstations, special machines or fully automated installations.
